CUMULATIVE EDITORIAL INDEX

Including January 1966 through June 1966. Number preceding hyphen is month of issue; those following are page numbers.
AUTOMATION *is indexed in the Applied Science & Technology Index and the Engineering Index, available in libraries generally.*
Microfilm copies are available from University Microfilms, 313 N. First St., Ann Arbor, Mich.

A

Alarm reporting, telephone, 6-15*
Analysis, of manufacturing problems, 2-68
Applying,
  gold plate letters, prob., 1-4*
  SCRs, 2-93
Armington, R. Q.
  Storing and Retrieving by Remote Control, 1-90
Assembling drill sets, prob., 6-4*
Assembly,
  brazing, 6-75
  circuit boards, prob., 3-4*
  economic aspects of, 2-154*
  equipment, 5-81
  machines, 4-80
  microcircuit, 1-84
  problem solving, 2-68
  small valves, prob., 1-4*
  tv tubes, 2-73
Attitudes of union members, 5-10*
Automatic
  assembly, 4-80
  control theory, 5-178*
  material handling, prob., 6-4*
  parts handling, 3-83
Automating drafting systems, prob., 1-4*
Automation,
  benefits of, 1-38*
  commission report on, 3-12*
  films booklet, 5-41*
  in libraries, 4-31*
  modular approach to, 5-77
  of short-run lots, 5-77
  in Sweden, 4-44*
  in United Kingdom, 3-46*
Automobile for busy executives, 4-27*
Award to AUTOMATION Magazine, 4-24*
Ayres, R. A.
  Magnetic Pulse Forming, 5-166*

B

Bahls, W. E.
  Memory and Logic in Automatic Control, 1-157*
Beaird, S. D.
  Computerized Production Control for Job-Lot Manufacturing, 2-76
Belt conveyor, spiral, 1-110
Bin problems, 6-84
Blackbody radiation, 6-95
Brakes, electromagnetic, 5-98
Brazing fixtures, 6-75
Broell, F.
  Modular Approach to Automation, 5-77
Brower, D. F.
  Magnetic Pulse Forming, 5-166*
Business and government, 4-182*
Bulk materials, 6-84
Butt, S. A.
  Profit & Loss Plots for Decision Making, 1-107

C

Cam design and manufacture, 2-172*
Canada, J. R.
  Techniques for Evaluating Investment Projects, 6-64
Capital investment analysis, 1-107
Careers in metallurgy, 5-36*
Casting,
  continuous, 2-104
  refractory metals, 5-34*
Circuits, printed, 4-77
Closed-loop control, 1-157*
Clutches, electromagnetic, 5-98
Comella, T. M.
  Understanding Creativity, 4-72
Communications
  planning, for data systems, 3-80
  for refinery personnel, 1-15*
Compatible computer systems, 1-100
Compression molding, 4-166*
Computer
  control and N/C, 1-78
  controlled parts production, 1-84
  methods, 1-168*
  program, 3-172*; 5-178*
  typesetting, 3-172*
Computerizing chemical processing, prob., 5-4*
Computers,
  compatibility in, 1-100
  in educational research, 6-33*
  with English input, 5-28*
  fluid-state, 5-163*
  importance of time-sharing, 2-15*
  for inventory control, 3-8*
  in job-lot assignment, 3-66
  for job-lot manufacturing, 2-76
  leasing of, 6-11*
  for maintenance check-out, 5-28*
  in manufacturing planning, 5-85
  in paper production, 5-44*
  process control, 6-168*
  production control, 2-76
  real-time communications, 3-80
  remote operation of, 6-151*
  in supermarkets, 3-9*
  threat to middle managers, 6-10*
  in vocational counseling, 5-41*
Construction scheduling, 2-171*
Controls,
  fluidic interface devices, 6-26*
  of job-shop production, 2-76
  limit switches, 3-89
  of mass transportation, 3-10*
  memory and logic use, 1-157*
  overhead, 3-172*
  pressure, 1-111
  production, 2-76
  radiation pyrometer, 6-95
  SCR, 4-90
  systems, photoelectric, 6-93
  temperature, 6-95
  temperature regulators, 3-100
  timing, 6-78
  tracer system for lathe, 2-36*
  for transfer machines, 5-42*
  web position, 4-105
Conveyors,
  food freezing, 1-110
  gravity, 4-97
  overhead trolley, 3-91
  spiral, 1-110
Creativity, 4-72
  in debugging, 2-68
Crouse, L. F.
  Gas-Fired Process Heating Systems, 3-97

D

Data
  acquisition systems, 4-27*
  collection system, 4-29*
  punched tape readers, 4-99
Data processing
  alarm reports by phone, 6-15*
  automatic drafting system, 2-15*
  bar-chart recorder, 2-12*
  communications planning, 3-80
  computer with English input, 5-28*
  computer for maintenance check-out, 5-28*
  curriculum guide, 2-172*
  errors in data transmission, 2-40*
  films booklet, 5-41*
  generating manufacturing plans, 2-26*
  high speed printer, 6-46*
  magnetic tape memory, 5-46*
  and police work, 2-34*
  principles of, 3-41*
  process control computer, 5-12*
  in rehabilitation program, 1-28*
  resistance to introduction, 1-15*
  retrieving field folders, 1-12*
  systems, assembled from modules, 4-15*
  vehicle scheduling, 2-11*
  ZIP code reader, 5-25*
Decision
  making, improving quality of, 3-22*
  making, profit and loss plots, 1-107
  tables, 5-85
Depalletizing, 6-70
Detectors, web positions, 4-105
Determining coating thicknesses, prob., 3-4*
Deunitizing, 6-70
Dictionary of technical terms, 3-172*
Dies, transfer, 1-94
Digital tape drives, 4-182*
Dispensing
  glue, prob., 3-4*
  solder flux, prob., 2-4*
Draeger, J. K.
  Handling Entangling Parts, 5-81
Drilling small orifices, prob., 2-4*

E

Economic justification, of assembly equipment, 2-154*
Economics,
  of automatic packaging, 2-83
  of capital expenditures, 2-153*
  expenditures for equipment, 1-11*
  of job-lot assignment, 3-66
  outlook for 1966, 1-9*
  profit and loss plots, 1-107
  Russian principles of managing, 3-45*
Eddy current
  flaw detection, 3-153*
  inspection system, 3-102
Edelman, A.
  Photoelectric Control Systems—Part 1, 6-93
Education
  computer teaches statistics, 1-28*
  and creativity, 4-72
  engineering education goals, 1-31*
  improved teaching methods, 3-43*
  industrial training courses, 5-41*
  and manpower, 5-178*
  need for hybrid engineer, 2-29*
  problems of vocational education, 1-28*
  quality control program, 4-33*
  reasearch by computers, 6-33*
  teaching engineering design, 1-31*
  teaching via television, 5-41*
  in technical sales, 5-15*
  time-sharing computer, 2-29*
  vocational equipment, 3-41*
  work-experience program, 2-32*
Electric motors, 1-168*
Electrodes, stainless steel, 3-70
Electromagnetic clutches and brakes, 5-98
Electron microscopy, 4-182*
Electronics terminology, 2-89
Engineering, planning manufacturing operations, 5-85
Equipment,
  electrostatic dusting, 4-39*
  justification, 2-153*
  leases, 5-74
Escapements, 3-83
Estimating costs, prob., 5-4*
Etching, microcircuit, 1-84
Evaluating
  employee performance, 5-22*
  investment projects, 6-64
  packaging equipment, 2-83

F

Feeding
  and orienting, 5-81
  polyethylene bottles, prob., 6-4*
Filling plastic shells, prob., 2-4*
Financing production improvements, 5-74
Finishing, wood tiles, 4-23*
Fixtures, brazing, 6-75
Fluid
  power units, 2-102; 5-106
  pumps and blowers, 6-168*
  state systems, 5-163*
Fluidics
  bibliography, 6-168*
  interface devices, 6-26*
  text, 3-172*
Food, ultrasonic preservation, 1-32*
Forming, magnetic pulse, 5-166*
Frit sealing, 2-73
Fuel cells, 3-34*

G

Gas-fired process heating, 3-97
Glossary of electronics terms, 2-89
Government,
  confronted by science, 4-12*
  and co-operative research, 3-15*
Gravity conveyors, 4-97
Gray, D.
  Zero Defects Program, 6-157*
Gulardo, R. E.
  Systems Approach to Materials Handling, 4-168*
Gulden, D.
  Choose the Right Pressure Regulator, 1-111
  Tips on Applying Temperature Regulators, 3-100

H

Hamill, R. D.
  Assigning Jobs Lots for Least Cost, 3-66
Handling,
  automated storage systems, 1-90
  entangling parts, 5-81
  materials, 6-84
  microcircuit components, 1-84
  product loading, 5-12*
  small parts, 5-81
  tv tubes, 2-73
Heat exchangers, 3-34*
Heating,
  fixtures for, 6-75
  gas, 3-97
  loads, SCR, 4-90
  process, 3-97
Heiser, E. F.
  Applying Limit Switches for Automatic Control, 3-89
Hoad, J. G.
  Comparing Capital Expenditure Projects, 2-153*
Hydraulic
  power units, 2-102
  systems, 5-106

I

Ida, N.
  Welding With Explosives, 6-157*
Inductive loads, SCR, 4-90
Industrial training courses, 5-41*
Information for international traders, 5-46*
Information processing, 1-168*
Infrared techniques, 5-30*
Inspection,
  carton verifier, 4-23*
  of delicate parts, 5-32*
  flaw detection techniques, 3-153*
  of metals, 4-46*
  of valve spring wire, 3-102
Instruments,
  in hazardous locations, 5-178*
  intrinsically safe, 1-34*
Integrated circuit, design philosophy, 2-36*
International trade, importance, 6-40*
Inventions and patent rights, 2-10*
Inventory control, prob., 4-4*
Investment projects, 6-64

J

Job lot assignment, 3-66

K

Kaimann, R. A.
  Assigning Job Lots for Least Cost, 3-66
Kay, J. G.
  Escapements for Automatic Parts Handling, 3-83
Keebler, J. C.
  Compatible Computer Systems, 1-100
  Solving Bin Problems, 6-84
Kelley, R. A.
  Remote Computing Requires Minimum Investment, 6-151*
Kronk, R. E.
  Non-Contacting Flaw Detection Techniques, 3-153*

L

Labor, co-operative agreements, 6-36*

*Asterisks indicate brief items appearing in departments.

Laser television system, 3-36*
Lasers,
manufacture drawing die, 2-24*
market study results, 5-10*
Lathe, noise suppression, prob., 1-4*
Leases, for equipment, 5-74
Leone, W. C.
Choosing Punched Tape Readers, 4-99
Lifting parts magnetically, prob., 2-4*
Lighting, more efficient lamp, 1-34*
Limit switch applications, 3-89
Linear programming, 3-66; 5-178*
Liquid levels, determing, prob., 1-4*
Logic systems in controls, 1-157*

M

MacDonald, R. D.
Miniature Hydraulic Power Units, 2-102
Machine tools,
attachment, chuck for odd-shaped parts, 6-42*
future controls, 1-78
Machines,
apply tape sealer, 6-30*
assembly, 4-80
classifying bars, 4-22*
soldering, 4-40*
transfer, 5-42*
Machining,
EDM and ECM, 2-172*
Magison, E. C.
Applying Radiation Pyrometers, 6-95
Magnetic
flux leakage testing, 3-153*
pulse forming, 5-166*
tape, 4-99
Maintenance, N/C machines, 1-160*
Management,
aid in determining draft status of employees, 4-29*
capital expenditure criteria, 2-153*
controls and systems, 5-178*
co-operative agreements, 6-36*
creative people, 6-9*
diversification markets, 6-12*
employee testing, 2-12*
environment of, 3-7*
evaluating employee performance, 5-22*
increased spending for R & D, 4-27*
international trade, 2-44*
motivating employees, 1-12*; 2-22*
obtaining occupational deferments, 2-9*
performance rating, 4-182*
philosophy, creativity, 4-72
profit & loss plots for decision making, 1-107
records, 3-172*
skills, developing, 2-171*
speaking out for industry, 6-33*
threatened by computers, 6-10*
wage settlements in 1965, 4-24*
Manufacture of,
circuit boards, 1-84
computers, 1-84
diodes, 1-84
flexible connections, 4-40*
helical springs, 5-81
job-lots, 3-66
microsize diodes, 3-31*
preimpregnated boron tape, 4-29*
transistors, 1-84
tv tubes, 2-73
wine, 5-42*
Manufacturing, planning of operations, 5-58
Marking,
small parts, prob., 6-4*
wood surfaces, prob., 5-4*
Materials,
automated storage system, 1-90
handling, 6-84
handling device, equalizes production flow, 4-22*
handling, systems approach, 4-168*
Measuring,
fat content of meat, 6-26*
metal in motion, 3-31*
miniature pressure gage, 5-34*
small spheres, 5-25*
Memory systems in controls, 1-157*
Methods, for evaluating investment projects, 6-64
Metric system, conversion, 6-39*
Microcircuits, manufacture of, 1-84
Modular automation, 5-77
Module, automation, prob., 5-4*
Molding techniques, 4-166*
Morgan, D. K.
Depalletizing Unit Loads, 6-70
Morgan, M.
Evolution of N/C, 6-156*

N

Nelson, R. A.
Systems Approach to Material Handling, 4-168*
Numerical control, 1-78
automobile production, 3-25*
circuit generator, 4-77
computer controlled, 1-84
computer system, 2-24*
evolution of, 6-156*
maintenance programs, 1-160*
principles of, 2-172*

O

Open-loop control, 1-157*
Optical circuit techniques, 4-77
Organization, bureaucratic form, 5-9*
Overhead conveyors, 3-91

P

Packaging,
cloth, prob., 4-4*
equipment evaluation, 2-83
materials, nonpackaging uses of, 4-36*
transistors, prob., 5-4*
Parts handling, escapements, 3-83
Patents, on microfilm, 3-15*
Philosophy of creativity, 4-72
Photoelectric
control systems, 6-93
tape reader, 1-41*
Pippenger, J. J.
Which Fluid Medium Is Best? 5-106
Planning
capacity expansion, 6-168*
conveyor systems, 3-91
Plunger molding, 4-166*
Pneumatic
control circuits, 5-77
reset timers, 5-90
systems, 5-106
Porten, C.
Automated Planning of Manufacturing Operations, 5-85
Positioning, web, 4-105
Power
transmission, fluid, 5-106
units, hydraulic, 2-102
Preble, B.
Planning Overhead Trolley Conveyors, 3-91
Prenting, T. O.
Economic Aspects of Automatic Assembly, 2-154*
Pressure regulators, 1-111
Printed circuits, tracing, 4-77
Process,
paint curing, 4-39*
printing maps, 1-38*
to remove epoxy, 1-34*
retarding oxidation, 1-36*
Producing welding electrodes, 3-70
Production,
control, 2-76
control of job-shop, 2-76
efficiency, automatic assembly, 2-154*
Profit and loss plots, 1-107
Profits, through automatic assembly, 4-80
Program timers, 3-72
Programmed teaching, 2-172*
Programming
with FORTRAN, 5-178*
FORTRAN, APT, Linear, PERT, and GPSS, 6-151*
matrix board, 1-41*
peg tape, 3-43*
Punched
cards, 4-99
tape readers, 4-99
Pyrometers,
bandpass, 6-95
brightness, 6-95
ratio, 6-95
total radiation, 6-95

Q

Quality control and reliability, 4-182*

R

Rader, W. S., Jr.
Evaluating Equipment for Automatic Packaging, 2-83
Radiation pyrometers, 6-95
Random-process simulation, 4-182*
Ransinger, H.
Communications Planning for Data Systems, 3-80
Readers, punched tape, 4-99
Receiving tube manual, 2-172*
Recording, data on film, 3-32*
Rectifiers, silicon controlled, 4-90
Redner, B. H., Jr.
Evaluating Equipment for Automatic Packaging, 2-83
Regulators, pressure, 1-111
Reliability, mechanical, 1-168*
Removing work chips, prob., 6-4*
Repeat cycle timers, 3-72
Research
science and technology, 4-24*
speed hearing, 5-32*
Reset timers, 3-72; 5-90
Resistive loads, SCR, 4-90
Rollo, G. F.
Tracing Printed Circuit Patterns, 4-77
Rotating a shaft, prob., 3-4*

S

Saake, M. G.
Programming Machine Operations with Respect to Time—Part 1, 3-72; Part 2, 5-90; Part 3, 6-78
Segregating crushed materials, 4-23*
Sensing,
height of liquids, 1-36*
systems, photoelectric, 6-93
Shaft bearings, prob., 4-4*
Shainin, D.
Strategies for Solving Manufacturing Problems, 2-68
Silicon controlled rectifiers, 2-171*
applying, 4-90
dc power applications, 2-93
Silicon rectifiers, 6-168*
Smith, W. M.
Non-Contacting Flaw Detection Techniques, 3-153*
Soldering fixtures, 6-75
Sorsen, S. L.
Basic Techniques for Controlling Web Position, 4-105
Sorting mail, automatically, 2-34*; 5-25*
Speed governors, 3-172*
Spray painting, prob., 6-4*
Stalhuth, W. E.
Electromagnetic Clutches and Brakes, 5-98
Standards
electrical, 4-182*
fastener, 6-168*
information sources, 3-172*
resistance welding, 2-172*
Statistical sampling, 2-171*
Stenoien, D. M.
Maintenance Program for N/C Machines, 1-160*
Stock retrieval, prob., 4-4*
Storage systems, 1-90
Structural models, 2-171*
Switches,
limit, 3-89
stepping, 6-78
Switching device for keyboards, 5-30*
Systems
approach, materials handling, 4-168*
real-time communication, 3-80

T

Tape
controlled palletizer, 4-39*
readers, punched, 4-99
Techniques, infrared, 5-30*
Telemetry, 4-182*
Temperature control, 3-100
Terminology, electronics, 2-89
Testing
ceramic strength, 3-32*
circuit boards, 1-36*
gas filters, prob., 4-4*
microcircuit, 1-84
Timers,
automatic reset, 5-90
gearshift reset, 5-90
hand set, 5-90
manufacturers, 3-72
motor/clutch operated reset, 5-90
multicircuit multiple interval reset, 6-78
pneumatic reset, 5-90
Training
aid for instrument technicians, 5-36*
building logic circuits, 4-31*
displaced workers, 4-12*
employees, 6-22*
programmed, product knowledge, 6-39*
skilled manpower, 4-33*
Transfer dies, for stamped parts, 1-94
Transformer loads, SCR, 4-90
Transportation, contract jet service, 5-15*
Triggering SCR gate leads, prob., 2-4*
Trolley conveyors, 3-91
Troubleshooting, production equipment, 2-68
Turning small parts, prob., 3-4*

U

Ultrasonic flaw inspection, 3-153*
Unemployment rate, what does it measure, 4-9*
Unit load depalletizing, 6-70

V

Vacuum depalletizing, 6-70
Vaill, E. W.
Trends In Automatic Molding Techniques, 4-166*
Valves, pressure regulating, 1-111
Vibrations, useful in manufacturing, 6-30*
